Blank Graph Paper Garden Design Worksheet

Free Plain Graph Paper from http://incompetech.com/graphpaper/plain/

1. Put the measurements you will be using for your garden on this graph. Plot your garden rows, leaving space for walking if your garden is larger than 4'wide.
2. Follow instructions on seed packet or small plants for exact spacing instructions, as this will vary from plant to plant.
3. Plant tallest plants on the north side of the garden, medium height plants in the middle, and shortest plants on the south end of the garden to ensure maximum sunlight for all your plants.

Note: Your garden layout can run from east to west, but the rows of vegetables that you plant should always run from north to south for maximum sun exposure.
