1. Use 2x6 lumber to build a four foot by four foot square frame. Fill the frame with garden or potting soil. Divide into 16 one-foot squares using a small strips of wood or string as dividers.
2. Follow instructions on seed packet or small plant for exact spacing instructions, as this will vary from plant to plant.
3. Plant tallest plants on the north side of the garden, medium height plants in the middle, and shortest plants on the south end of the garden to ensure maximum sun exposure.
