Vegetable Garden Planting Calendar

A Month-by-Month Guide for a Bountiful Harvest

VEGETABLE	PLANTING GUIDE	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC
LETTUCE	Cool weather crop. Plant in early spring and again in fall.												
SPINACH	Very cold hardy. Plant early spring or late summer.												
PEAS	Plant as soon as soil can be worked in spring.												
CARROTS	Plant in spring and again in mid-summer for fall.												
BEANS	Plant after danger of frost has passed.												
TOMATOES	Start seeds indoors. mid-February to end of March.												
CUCUMBERS	Plant after soil is warm.												
SQUASH	Plant after soil is warm.												
KALE	Plant in early spring or late summer.												
CABBAGE	Start seeds indoors. Plant in spring or late summer.												
RADISHES	Quick crop. Plant often.												
BEETS	Plant in spring or mid-summer.												

KEY

- Sow Seeds Outdoors
- Plant Seeds Outdoors (Warm Weather)
- Start Seeds Indoors
- Plant Anytime (Multiple Successions)

TIPS FOR SUCCESS

- Check your last frost date in spring and first frost date in fall.
- Succession planting every 2–3 weeks provides a continuous harvest.
- Keep soil moist and nutrient rich for best results.
- Harvest regularly to encourage more production.

GENERAL GUIDELINES

Cool Season Crops (Lettuce, Spinach, Peas, Kale, Cabbage) grow best in spring and fall.

Warm Season Crops (Tomatoes, Peppers, Cucumbers, Beans, Squash) need warm soil and no danger of frost.

Know Your Zone
Adjust planting times based on your USDA Hardiness Zone and local climate.

Plan it well,
plant it right,
enjoy the harvest!
