Healthy Tomatoes Happier Gardens

DETERMINATE vs. INDETERMINATE TOMATOES

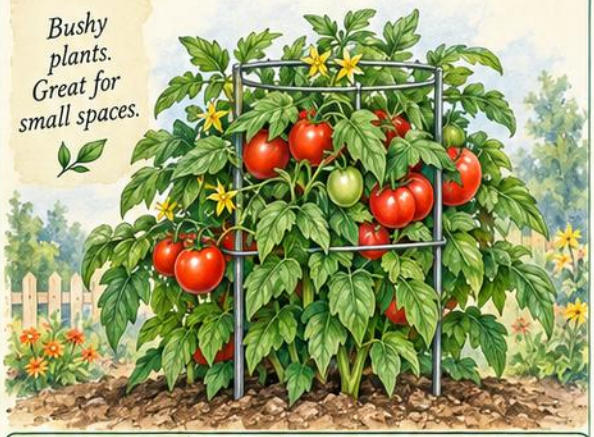

Two Growth Habits. A Harvest for Every Garden.

Good Gardening Grows a Brighter Tomorrow

DETERMINATE

Compact plants • Concentrated harvest

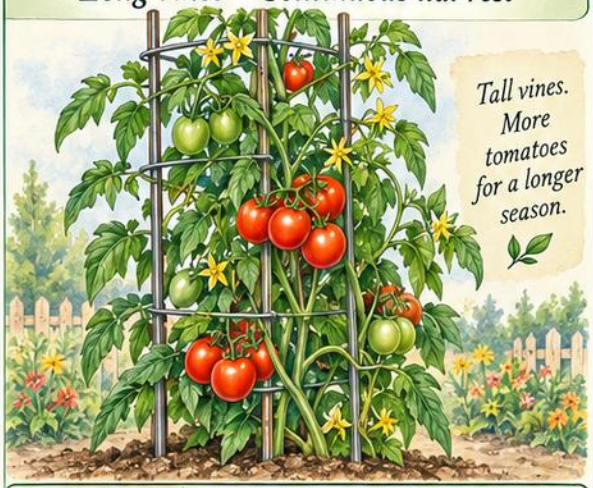

Bushy plants. Great for small spaces.

GROWTH	Stops growing at a set height
HEIGHT	Usually 3–4 feet
HARVEST	Most fruit ripens within a few weeks
SUPPORT	Short cage or sturdy stake
PRUNING	Little or no pruning
BEST FOR	Containers, small gardens, canning, and preserving
POPULAR TYPES	Roma, Bush Early Girl, Celebrity

INDETERMINATE

Long vines • Continuous harvest

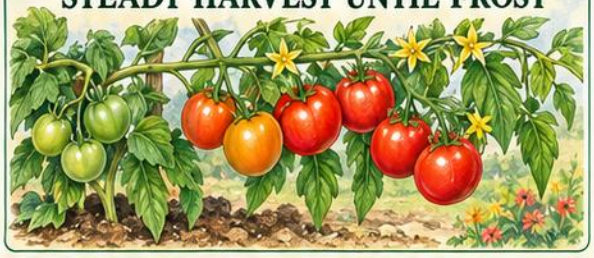

Tall vines. More tomatoes for a longer season.

GROWTH	Keeps growing until frost
HEIGHT	Often 6–10 feet or more
HARVEST	Fruit ripens steadily through the season
SUPPORT	Tall cage, trellis, or strong stakes
PRUNING	Optional; remove some suckers to manage size
BEST FOR	A long supply of fresh tomatoes
POPULAR TYPES	Brandywine, Cherokee Purple, Sungold

ONE LARGE HARVEST WINDOW

STEADY HARVEST UNTIL FROST

WHICH TYPE SHOULD YOU GROW?

Choose determinate tomatoes for compact plants and a concentrated crop.
Choose indeterminate tomatoes for a longer harvest and more vertical growth.

CHECK THE LABEL

Growth habit, mature size, and support needs can vary by variety.
