

COMPANION PLANTING

Good Plants Grow Better Together! ♥

Companion planting pairs plants that help each other grow, repel pests, and improve flavor. ♥

MAIN CROP	GOOD COMPANIONS	BENEFITS
TOMATOES 	Basil • Marigolds • Garlic   	♥ Basil improves flavor and helps repel pests. ♥ Marigolds repel nematodes and other insects. ♥ Garlic deters aphids and whiteflies. 
CARROTS 	Onions • Leeks • Radishes   	♥ Onions and leeks repel carrot root flies. ♥ Radishes help break up soil and mark rows. 
CABBAGE 	Nasturtiums • Dill • Celery   	♥ Nasturtiums attract aphids away from cabbage. ♥ Dill attracts beneficial insects. ♥ Celery improves growth and flavor. 
BEANS 	Corn • Marigolds • Squash   	♥ Corn provides support for beans to climb. ♥ Marigolds repel pests. ♥ Squash shades soil and retains moisture. 
CUCUMBERS 	Dill • Nasturtiums • Radishes   	♥ Dill attracts pollinators and beneficial insects. ♥ Nasturtiums repel cucumber beetles. ♥ Radishes improve soil and discourage pests. 
PEPPERS 	Basil • Onions • Spinach   	♥ Basil enhances flavor and repels flies. ♥ Onions deter pests. ♥ Spinach grows low and keeps soil cool and moist. 

Healthy soil, diverse plants, and good companions lead to a happy, productive garden! ♥
