

USDA Planting Zone	Average Last Frost Date (Spring)	Typical Range
Zone 1	May 21 – June 10	May 10 – June 30
Zone 2	May 1 – May 20	April 20 – June 10
Zone 3	April 21 – May 10	April 10 – May 30
Zone 4	April 11 – April 30	March 30 – May 20
Zone 5	April 1 – April 20	March 20 – May 10
Zone 6	March 21 – April 10	March 10 – April 30
Zone 7	March 11 – March 20	February 20 – April 10
Zone 8	February 21 – March 10	February 10 – March 30
Zone 9	February 1 – February 20	January 20 – March 10
Zone 10	January 1 – January 31	January 1 – February 20

Helpful Tips:

- Your local frost date can vary based on elevation, distance from water, and other microclimates.
- For the most accurate date, check your local National Weather Service or use the USDA Plant Hardiness Zone Map.
- Most warm-season vegetables (like tomatoes, peppers, beans and squash) should be planted after the last frost date.
- Cool-season crops (like lettuce, peas and carrots) can often be planted 2–4 weeks before the last frost date.
