

Personalized Vegetable Planting Calendar

Make this calendar work for YOUR frost,
YOUR location, and YOUR family.

1 Know Your Frost Dates

Record your average frost dates from our zone finder, and your actual observed dates from past seasons.

Our Zone Finder Average Dates

Last Spring Frost _____

First Fall Frost _____

Growing Season
(Approx. Days) _____

Notes _____

My Observed Dates (From My Garden)

2 Know Your Garden Micro-Climate

Make notes about how your garden is different from the average for your area.

My garden is located: _____

Sun exposure: _____

Is it sheltered from wind? _____

Does frost collect in low areas? _____

My spring soil warms up: _____ weeks earlier / later than average

My fall frost comes: _____ weeks earlier / later than average

Other notes about my garden: _____

3 Grow What You Eat

Plan your plantings around the vegetables your family eats most. Plant the right amounts, at the right times, for a steady harvest.

Vegetable

What We Like (How Much)

How Often to Plant (e.g., every 2 weeks)

Notes

4 Keep Learning

Update your dates and notes each year as you learn more about your garden.

My Observations & Lessons Learned This Year

Happy Gardening!

The best garden calendar is the one YOU create and update each year.
