

Personalized Vegetable Planting Calendar

Make this calendar work for YOUR garden,
YOUR location, and YOUR family.

1 Know Your Frost Dates

Record your average frost dates from our zone finder, and your actual observed dates from past seasons.

Our Zone Finder Average Dates

My Observed Dates (From My Garden)

Last Spring Frost _____

First Fall Frost _____

Growing Season
(Approx. Days) _____

Notes _____

2 Know Your Garden Micro-Climate

Make notes about how your garden is different from the average for your area.

My garden is located: _____

Sun exposure: _____

Is it sheltered from wind? _____

Does frost collect in low areas? _____

My spring soil warms up: _____ weeks earlier / later than average

My fall frost comes: _____ weeks earlier / later than average

Other notes about my garden: _____

3 Grow What You Eat

Plan your plantings around the vegetables your family eats most. Plant the right amounts, at the right times, for a steady harvest.

Vegetable

What We Like (How Much)

How Often to Plant (e.g., every 2 weeks)

Notes

4 Keep Learning

Update your dates and notes each year as you learn more about your garden.

My Observations & Lessons Learned This Year

The best garden calendar is the one YOU create and update each year.
