Spring Vegetables to Plant

Hello Spring!

Plant Early for a Great Harvest!

Cool weather crops for a healthy, bountiful garden!

Beets

Plant: 2–4 weeks before last frost.
Days to harvest: 50–70.
Notes: Cool weather crop. Keep evenly watered.

Broccoli

Plant: 2–4 weeks before last frost.
Days to harvest: 60–100.
Notes: Start from seeds or transplants.

Carrots

Plant: 2–3 weeks before last frost.
Days to harvest: 60–80.
Notes: Sow seeds directly in the garden.

Garden Peas

Plant: 4–6 weeks before last frost.
Days to harvest: 60–70.
Notes: Provide a trellis for best results.

Onions

Plant: 2–4 weeks before last frost.
Days to harvest: 90–120.
Notes: Plant sets or start from seed indoors earlier.

Lettuce

Plant: 2–4 weeks before last frost.
Days to harvest: 30–60.
Notes: Sow seeds directly. Grows best in cool weather.

Potatoes

Plant: 2–4 weeks before last frost.
Days to harvest: 70–100.
Notes: Plant seed potatoes 4–6 inches deep.

Spinach

Plant: 2–4 weeks before last frost.
Days to harvest: 40–50.
Notes: Prefers cool weather. Sow seeds directly.

Radishes

Plant: 2–4 weeks before last frost.
Days to harvest: 20–30.
Notes: One of the fastest growing vegetables. Sow seeds directly.

Turnips

Plant: 2–4 weeks before last frost.
Days to harvest: 40–60.
Notes: Sow seeds directly. Harvest roots or tender greens.

Cabbage

Plant: 2–4 weeks before last frost.
Days to harvest: 70–100.
Notes: Start from seeds or transplants. Grows best in cool weather.
