# Types of Raised Bed Gardens

## Framed Raised Beds

- Most common type
- Sides are built with wood, metal, stone, or other materials
- Holds soil in place and gives a neat, defined space

## Mounded Raised Beds

- Soil is mounded up above the ground
- No frame needed
- Can be made with compost-rich soil and organic matter
- A natural, low-cost option

## Elevated Raised Beds

- Built on legs, raised higher off the ground
- Easier on the back and knees
- Great for small spaces, patios, or areas with poor soil
- Can be built from wood, metal, or other materials
